## Comments from Sam. Jotipanno

I was measuring different cleaning products this morning and reached the conclusion that 90% of them are up to 28cm tall. Considering this and some "out of proportion" bottles, I removed 1 shelf in Unit 1 and added 2 shelves in Unit 2, the idea is that Unit 1 can fit all sorts of sizes while Unit 2 could be for the smaller stuff. Are you alright with it? Please take a look at the following link:

<https://www.fittingly.co.uk/design-tool#WJAT4RRX>

I was wondering if we have some empty space to hang mops and brooms in the wall after we put the boiler room shelves in there.

I wouldn't need a lot of empty space in the wall, but I am counting 6 mops and 8 brooms.

I am also thinking about 6 Buckets, they could fit in the shelves easily, but then you lose some storing space...
