Wiki Training

This page is a draft and is still in construction. It aims at documenting all the relevant information for a new user of the wiki.

Navigation

This wiki is arranged following a natural language hierarchy inspired by the familiar **library**:

- Shelve
- Book
- Chapter
- Page
- Header level

To navigate throughout the wiki, simply click on the [main Logo](#) on the top left of the wiki. This will give you an overview of the main sections of the monastery. Toggle the **List View** in order to see the book titles on every shelf.

"Watching" content

You will receive notification, as you choose in your setting, when people modify or edit content you have created or on books/pages you are watching. You can watch content by clicking on the button "watch" in the info column of your chosen content.

Editing

Images

Drag and drop images from your computer directly in the edit mode, or use the image icon in the toolbar.

If you align them right or left, the images will be merging with the text for nice effect !

Resize them and drag them where you need them.

Attachment

The wiki allow you to attach any file to a page. Click on the left bar in **edit mode** on the attachment icon to upload files. The attachments will be displayed in the top left section of the page for the user to download or to view. When clicking on the little arrow next to them, you will find the links to download or view. By right-clicking on the view link, you can copy the link address and use it in a button like this one below. (See *how to make a button* below)

Open PDF in a new tab

The goal of the wiki is not to become a new place for storage files. Although you can attach a file to any page, most of the time, files are in google Drive. The goal of the wiki is to act a nexus point allowing access to the information and its presentation (avoiding silos).

Tags

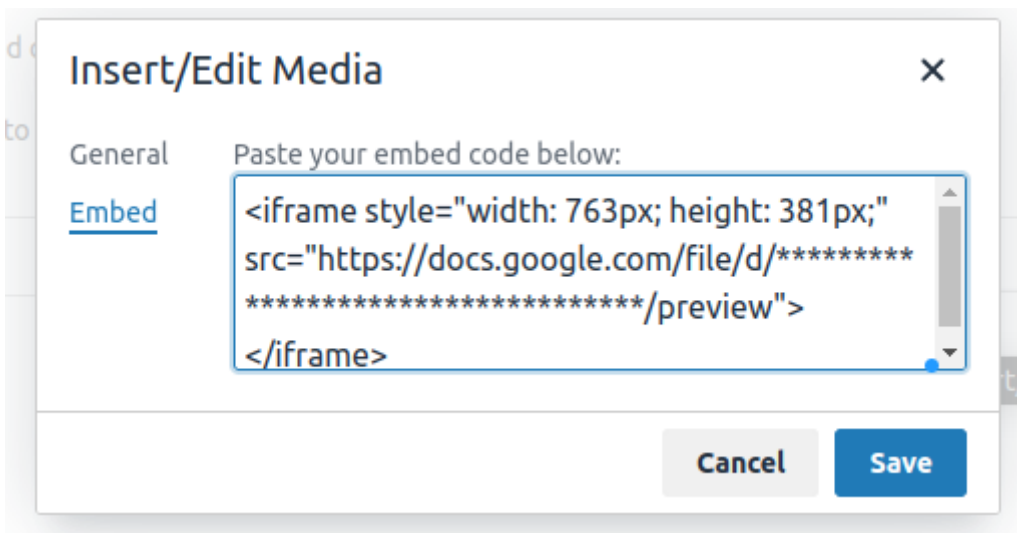

You can search by tags using "[tag]" bracket in the search bar. (could propose a little button on the side of the search bar that looks like a tag.)

User Profile

Edit your user profile with relevant information. If you have used a position amaravati account instead of a personal amaravati account when login in, make sure you add your name to your position, like: Audio Editor (Issaro Bhikkhu)

Work flow

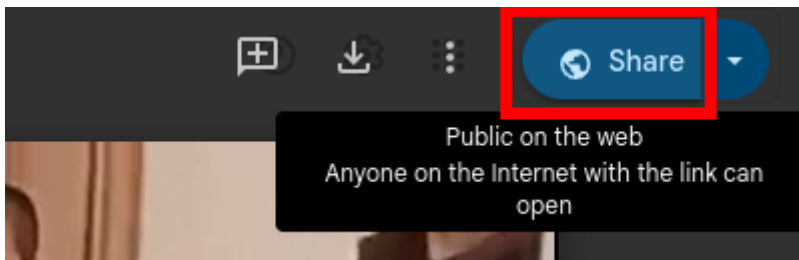

Philosophy

You have to replace the xxxxxxxxxxxxxxxxxxxxxx field by the ID of your document or folder (see below).

How to find the ID of a Google Document

The easiest way to find the ID is click on **Share** when viewing your document (video, google doc, audio file)

and clicking on **Copy Link**

The link contain a **unique ID** that is a string of character of the form

<https://drive.google.com/file/d/12F6o4JAY0AWUGks0P4EUTv9kb9RclIct/view?usp=sharing>

Copy and paste the ID in place of the stars, and make sure your document or folder is *shared with anyone with the link*.

Examples

This method will give the result below for a google Doc

<https://docs.google.com/file/d/1mMum8jgCjVS0ZmQKD5medeFVGf4BPMFEV8LecZv3uCo/preview>

see <https://mori.pages.dev/blog/embed-google-drive-folders> for more info

Google Drive Folder Special Embed

Here, for example, the code :

```
<iframe style="width: 100%; height: 600px; border: 0;"  
src="https://drive.google.com/embeddedfolderview?id=1wzzG6D8545TNnA-bQSUT2wJ4adwgvYWu#list"></iframe>
```

was added in the source code of the edit mode replacing the id of the folder by the one you want. It display as follow.:

<https://drive.google.com/embeddedfolderview?id=1wzzG6D8545TNnA-bQSUT2wJ4adwgvYWu#list>

PDF

To imbed a pure PDF from a google Drive, click on Open in new window on the corner right when viewing a PDF.

Then change the URL **view->preview** at the end. This will give you a pure PDF without any UI

Then a simple iframe will do the trick:

```
<iframe src="https://drive.google.com/file/d/17yGPG7jO87dF8OvKYoB20RUAzP0yB_QO/preview"></iframe>
```

change the height attribute for a better fit to the page

```
<iframe style="width: 880px; height: 900px;" src=...
```

You will find example of this on the [Atem Mini Pro](#) page.

Embedding a Video

A similar approach can be used to embed a video on a page. Remember to store (or host) your video files on Google Drive and share it with anyone with the link to make it widely accessible.

```
<iframe src="https://drive.google.com/file/d/12F6o4JAY0AWUGkS0P4EUTv9kb9RcllCt/preview" width="640"  
height="480"></iframe>
```

<https://drive.google.com/file/d/12F6o4JAy0AWUGkS0P4EUTv9kb9RcllCt/preview>

Power User Features

The following video shows more advanced feature of the wiki.

<https://www.youtube.com/embed/tSaDVduc3ul>

https://www.youtube.com/embed/R3RuxqV01yk?list=PLlJi4SL06EidqlySHJNGyQ_rLpMY3nmE

Overview of the wiki

To have an **overview** of the content of the wiki. Click on the Amaravati Logo at the top left. You can then enable a list view (on the right) which will show all the book titles of the wiki under their respective shelves.

AI Images

How to create nice images for wiki shelves and book covers

1. Go to: <https://bing.com/create>
2. Connect with a Microsoft account
3. Prompt it!
4. Click on the image you like
5. Downloads

Different style

Tags Managment

- Create tag for your **name**
- create **todo** tag for todo list

When combining the two in the search you will have all your todo list with your name on it ;-)
